

Transactional Print & Mail

Award-Winning Document Design, High-Volume Print and Automated Customer Engagement

Optimised document layout for maximum effectiveness

Automated technologies produce high-speed, high-fidelity output

Flexible design templates enable easy document changes

Fully customizable and scalable process

Transpromotional insert capabilities enhance marketing engagement

Overview

XBP Europe provides a convenient and cost-effective approach to print and mail management with the innovative flexibility of merged physical and electronic communication delivery. Control all aspects of your transactional mail process through an easy-to-use web portal, and enjoy the superior speed and processing capability of secure automated systems.

Key Features

Fully Customisable Solutions

We build onsite, offsite, and hybrid mail production and processing systems to client needs and exact specifications. All aspects of the system, from mail piece design to processing specifics are engineered to achieve defined business objectives.

High-Volume Offsite Printing

Our extensive network of print centres have been designed and built using the latest high-speed printing units. This gives us the ability to manage print and mail projects of any size and complexity, while maintaining the highest levels of accuracy and compliance.

Accurate Automated Processing

High-speed automated mail piece production, mail finishing, folding, and inserting, using optical mark recognition technologies for piecelevel tracking, ensures high-fidelity processing regardless of volume.

Full Visibility and Control

Our integrated web portal gives easy access to real-time operational and cost tracking, which simplifies your reconciliation process and allows for procedure tuning as necessary.

Flexible Template Framework

XBP Europe offers an award-winning letter composition system that speeds-up turnaround time on text changes by establishing a template-based framework that is quickly adaptable to evolving demands.

Address Verification & Return Mail

Respond to the 'Undeliverable as Addressed' problem to eliminate waste, improve mail delivery rates, and lower operating costs. Address verification and return mail services cross reference databases, capture data changes, and update records so your mail reaches its recipients.

Cost Savings

XBP Europe's mail processing centres offer savings through process efficiencies, machine automation, postage optimization, and presorting and commingling discounts.

Business Continuity Assurance

We mitigate business risk by ensuring that time-sensitive communications continue to be processed without interruption – even in the face of a major disaster event. Our offsite print centres and multifunctional Mega Centers have redundant power systems, high volume capability, and the process expertise necessary to keep you up and running, no matter what.

About

XBP Europe offers innovative solutions for customers to streamline complex bills and payments processes. We help enterprises, SMBs and public sector organisations globally to rethink transactions, digitisation, operations, communications and remote working. Get in touch today.
